ABSTRACT

Results for grade 12 are represented for the April 11-13, 1989 administration of the New Jersey High School Proficiency Test (HSPT), a requirement for high school graduation for New Jersey students. The test is initially given in grade 9. Data are provided for 762 12th-grade students who were taking the test for the first time or were repeating the test because of previous failure. After 23 preliminary data tables, 25 pages of tables present results for reading, mathematics, and writing by District Factor Group (DFG), urban district, and Regional Curriculum Services Unit region. District-by-district and school-by-school results are grouped by DFG. The DFG is an indicator of the socioeconomic status of the students in each district. Scores exclude special education and limited English-proficient students and those whose answer folders were voided. Overall, 84.2% of the 215 12th graders who completed the reading section passed it; 53.6% of the 549 12th graders who completed the mathematics section passed it; and 67.0% of the 345 12th graders who completed both the essay and multiple-choice components of the writing section passed it. (SLD)

Spring 1989 High School Proficiency Test Results - Grade 12
Executive Summary

The New Jersey High School Proficiency Test (HSPT) consists of three sections--reading, writing, and mathematics--and must be passed as one of the requirements for a high school diploma. If a student does not pass one or more sections, he or she will receive additional instruction and will be retested on that section or sections. The passing scores for the HSPT are: reading - 75, mathematics - 61, writing - 77.

The HSPT was administered on April 11, 12, and 13, 1989 to *67,099 students in grade nine, *6,352 students in grade ten, *3,018 students in grade eleven, and *762 students in grade twelve. The students in grades ten, eleven, and twelve who were tested included those who previously did not pass one or more sections of the test as well as newly-enrolled tenth, eleventh, and twelfth graders who did not attend a New Jersey public school as ninth, tenth, or eleventh graders.

This report includes a series of tables summarizing test results statewide for grade twelve for reading, writing, and mathematics. (The performance of students in grades nine, ten, and eleven is presented in separate reports.)

Results for each subject are presented, along with tables that present student performance for the following categories: District Factor Group (DFG), 56 Urban Districts, and Regional Curriculum Services Unit regions (RCSUs). Finally, the report contains district-by-district and school-by-school results grouped by DFG. An explanation of District Factor Groups is included at the end of this report.

Results are presented for all grade twelve students tested, including those who were retested and those who took the test this year for the first time. It is not appropriate to compare results of retested students with those who took the test for the first time.

The HSPT scores in this report exclude special education students, limited English-proficient students, and students whose answer folders were voided.

The data in this report are based on information collected from students' answer folders. Subsequent to the distribution of test results to districts in June, there is a procedure for amending student identification information to correct errors that were made when students' answer folders were completed. Timelines did not allow any such approved amendments to the data to be included in this report.

---

* This figure represents the total number of students to whom at least one section (reading, mathematics, or writing) of the HSPT was administered, excluding those classified as special education or limited English-proficient.

Reading

Of the 215 students tested, 99 (46.0 percent) were students who were retested this year because they previously did not pass the reading section of the test, and 116 (54.0 percent) were newly-enrolled students who did not take the HSPT as ninth, tenth, or eleventh graders. The percent of all twelfth graders who passed the reading section was 84.2. For retested students, the percent passing was 67.7. For newly-enrolled students taking the reading section for the first time, the percent passing was 98.3. The mean score for all twelfth-grade students was 87.6; for retested students, it was 78.4; and for first-time takers, 95.4.

The score distributions indicate that a substantial percentage of the students who did not pass the test scored between 50 and 74, the category just below the passing score of 75. For all twelfth graders tested, 15.8 percent scored between 50 and 74, and less than 0.1 percent scored 49 or below. This was also evident with retested students where 32.3 percent scored between 50 and 74 and less than 0.1 percent scored 49 or below, as well as with first-time takers where 1.7 percent scored between 50 and 74 and less than 0.1 percent scored 49 or below.

In the 56 Urban Districts, 75.2 percent of all students passed the reading section of the test. The percent passing for retested students was 63.0 and for newly-enrolled students taking the reading section for the first time, 95.8. The mean score for all students was 82.9; for retested students, it was 76.9; for first-time takers, 93.2.

In All Other Districts, the percent passing was 97.7. Among retested students, 88.9 percent passed the reading section; among newly-enrolled students, the percent was 100.0. The mean score for all students was 94.6; for retested students, it was 85.5; for first-time takers, 97.0.

Mathematics

The mathematics section of the test was administered to 549 students in twelfth grade. Of this number, 429 (78.1 percent) were retested this year because they previously did not pass the mathematics section of the test, and 120 (21.9 percent) were newly-enrolled students who did not take the HSPT as ninth, tenth, or eleventh graders. This year 53.6 percent of all students passed the mathematics section. This includes 42.9 percent of retested students and 91.7 percent of students taking the mathematics section for the first time. The mean score for all students was 64.0; for retested students, it was 58.9; and for first-time takers, 82.2.

The score distributions indicate that 38.8 percent of all students scored between 41 and 60, the category just below the passing score of 61, and that 7.7 percent scored 40 or below. For retested students and first-time takers, the percent scoring between 41 and 60 was 47.6 and 7.5, respectively. The percent of retested students who scored 40 or below was 9.5; for first-time takers, the percent was 0.8.

In the 56 Urban Districts, 42.2 percent of all students passed the mathematics section of the test. Retested students had a passing rate of 35.8 percent; for students taking the mathematics section for the first time, the passing rate was 84.0 percent. The mean score for all students was 59.2. For retested students the mean was 56.5 and for first-time takers, 76.9.

In All Other Districts, 77.7 percent of all students passed the mathematics section of the test. For retested students, the percent passing was 64.8; for those taking the test for the first time, 97.1 percent passed. The mean score for all students was 74.2. Retested students and first-time takers had mean scores of 66.3 and 86.0, respectively.

Writing

The number of all twelfth-grade students who completed both the essay and multiple-choice components of the writing section was 345. This includes 222 (64.3 percent) students who were retested and 123 (35.7 percent) students who took the writing section for the first time. This year 67.0 percent of all students passed the writing section of the test. Among retested students, 52.3 percent passed, and among first-time takers, 93.5 percent passed. The mean score for all students was 80.5. Retested students had a mean score of 76.9, and students who took the writing section of the test for the first time had a mean of 87.2.

The score distributions indicate that a high percentage of students who did not pass the writing section of the test scored between 65 and 76, the category just below the passing score of 77. For all students, 29.9 percent scored between 65 and 76, while 3.2 percent scored 64 or below. Among retested students, 42.8 percent scored between 65 and 76, and 5.0 percent scored 64 or below. Among students tested for the first time, 6.5 percent scored between 65 and 76, and less than 0.1 percent scored 64 or below.

In the 56 Urban Districts, 55.8 percent of all students passed the writing section of the test. Retested students had a passing rate of 46.9 percent; for students taking the writing section for the first time, the passing rate was 87.8 percent. The mean score for all students was 77.9. For retested students the mean was 75.8 and for first-time takers, 85.4.

In All Other Districts, 88.2 percent of all students passed the writing section of the test. For retested students, the percent passing was 73.3; for those taking the test for the first time, 97.3 percent passed. The mean score for all students was 85.5. Retested students and first-time takers had mean scores of 81.0 and 88.3, respectively.

On the essay component of the writing section, the statewide mean was 7.1 for all students, 6.6 for retested students, and 8.2 for students tested for the first time. The score distributions indicate that 51.1 percent of all students had essay scores between 8 and 12. For retested students, the percent was 34.4, and for first-time takers, 80.8.

In the 56 Urban Districts, the mean score was 6.8 for all students, 6.6 for retested students, and 7.6 for students taking the HSPT for the first time. In All Other Districts, the mean score was 7.8 for all students, 6.5 for retested students, and 8.6 for students taking the HSPT for the first time.

On the multiple-choice component of the writing section, the statewide mean was 82.1 for all students, 77.7 for retested students, and 90.2 for students taking the HSPT for the first time. The score distributions indicate that 94.8 percent of all students scored 61 or above, while 91.8 percent of the retested students and 100.0 percent of the first-time takers scored in this range.

In the 56 Urban Districts, the mean score was 78.5 for all students, 76.0 for retested students, and 87.7 for students taking the HSPT for the first time. In All Other Districts, the mean was 89.0 for all students, 84.1 for retested students, and 91.9 for students taking the HSPT for the first time.

Summary

The percent passing for all twelfth-grade students tested was 84.2 in reading, 53.6 in mathematics, and 67.0 in writing. The number of students who did not pass each section of the test was 34 in reading, 255 in mathematics, and 114 in writing.

COMMUNITY TYPES AND DISTRICT FACTOR GROUPS

A. Community Types

1 — Urban Center (UC): densely populated with extensive development.
2 — Urban-Suburban (US): near an urban center but not as highly developed, with larger residential areas.
4 — Suburban (S): predominantly single-family residential within a short distance of an urban area.
5 — Suburban-Rural (SR): rapidly developing area, but still large tracts of open land available for development.
6 — Rural (R): scattered small communities and isolated single-family dwellings.
7 — Rural Center (RC): high-density core area with surrounding rural municipalities.
8 — Rural Center Rural (RCR): small developed core area surrounded by rural areas.
9 — Vocational (V): primary emphasis on vocational training under a separate educational jurisdiction.
0 — Regional District (RD): an educational jurisdiction established to service several surrounding communities.

B. District Factor Groups

The District Factor Group (DFG) is an indicator of the socioeconomic status of citizens in each district and has been useful for the comparative reporting of test results from the statewide testing programs. The measure was first developed in 1974 using demographic variables from the 1970 United States Census. Since that time, however, the socioeconomic status of some districts may have changed considerably. Therefore, an updating of the DFG designations was needed.

The DFG's have been updated using seven socioeconomic variables from the 1980 United States Census. These are:

(1) Educational level

1 = elementary (0-8 years) through high school (1-3 years)
2 = high school (4 years)
3 = college (1-3 years)
4 = college (4 years)
5 = college (5+ years)

(2) Occupational status

1 = laborers
2 = service workers (except private and protective)
3 = farm workers

4 = operatives and kindred workers
5 = protective service workers
6 = sales workers
7 = clerical and kindred workers
8 = craftsmen, foremen, and kindred workers
9 = quasi-professionals
10 = managers, officials, and proprietors
11 = old and new professionals

(3) Density

number of persons per household

(4) Urbanization

percent of district considered urban

(5) Income

median family income

(6) Unemployment

percent of those in the work force who received some unemployment compensation in 1979

(7) Poverty

percent of residents below the poverty level in 1979

The variables were combined using a statistical technique called principal component analysis, which resulted in a single measure of socioeconomic status for each district. Districts were then ranked according to their value on this measure and divided into 10 equally-sized groups. Hence, DFGs range from A (lowest socioeconomic districts) to J (highest socioeconomic districts). In addition, special service districts are not included and all vocational districts are designated DFG "V".
